

## EUCI Virtual Program: Solar Supply Chain Essentials: Challenges and Paths Forward

**01.20.2022**

Richard Mojica will speak at EUCI's virtual program, [Solar Supply Chain Essentials: Challenges and Paths Forward](#), on January 20-21, 2022. This program will discuss key elements of the solar project development supply chain, what the pressures are and how they may impact the timing and delivery of projects, and some possible countermeasures to lessen the impact on project development outcomes.

Mojica will participate in two separate panel discussions, "Market Conditions and Externalities that Affect the Supply Chain," on January 20, and "Strategies for Minimizing Project Development Delays Due to Supply Chain Disruptions," on January 21.
