

Kinetek Webinar: Tariff Trouble: Navigating Rising Costs and Contract Risk in Government Contracting

05.21.2025

Alex Sarria will speak on the panel of the Kinetek webinar, "Tariff Trouble: Navigating Rising Costs and Contract Risk in Government Contracting," on May 21, 2025. Tariffs have become a costly new challenge for government contractors. Executive orders and shifting global trade policy are driving up supply chain prices, impacting subcontractor rates, and leaving contractors to foot the bill. FAR clauses like 52.229-3 and 52.229-4 offer some guidance — but they're open to interpretation and often require legal support to enforce.

In this 60-minute webinar, experts from Kinetek, Miller & Chevalier, and Forvis Mazars break down the financial, legal, and operational implications of tariffs on government contracts organizations. It will explore the full lifecycle of this issue, from policy changes to system setup, so your team is equipped to navigate the complexities and protect your bottom line.
