

Languages Spoken by Firm Lawyers

Our investigations practice is specifically designed to operate across the globe. It includes more than 40 attorneys, nearly half of whom are fluent in at least one foreign language. These attorneys are subject matter specialists, not just lawyers who happen to be fluent in a particular language. Our language and cultural fluency allow us to navigate all of the difficult local issues that can arise when lawyers are overseas investigating matters with potential enforcement risk. Our active presence in these jurisdictions allows us to maintain ties with local firms that we have found share both our expertise in key substantive areas and our client service values.

Our attorneys speak and work in 14 different languages:

- ▶ Arabic
